## Kitchen Gold Winners

**Induction Hob T44T80 with Point & Twist Control by Neff** - The Point & Twist control created by Neff is a magnetic attachment to the hob. To select a particular zone, the metallic dial is just turned and then tipped to choose the desired area of the hob.

It is totally removable when not in use, offering easy cleaning of the hob surface, smooth uncluttered aesthetics and an additional safety measure to keep the controls out of reach of children.

**U-See Oven by Hoover Candy** - Clever lighting is at the heart of the U-See Oven's innovative design. 14 white LED lights located in the oven door illuminate the whole cavity and act as a low energy alternative to conventional oven bulbs. U-See uses just 1 watt of power compared to anything up to 50 watts used by standard oven lighting systems.

The oven also has a range of other clever efficiency features including a variable speed fan to optimise cooking temperature and airflow.

**Openspace by Hotpoint** - A groundbreaking built-in oven that provides the versatility of a double-oven in a single oven space. Designed by Makio Hasuoka, the space inside can be separated with a thermally insulating divider to enable each space to be operated independently with its own temperature and time controls.

**GlassEco surfaces by GlassEco** - British company GlassEco has truly innovated with its impressive recycling-based product. With ingredients including discarded wine bottles, sea-shells, jam jars, car brake lights, beer bottles and clear glass, the recycled worktops are clean, safe and made in the UK without creating waste.

**Zaha Hadid Tap by Zaha Hadid for Triflow Concepts** - The picture very much speaks for itself, with Hadid's trademark styling transferred painstakingly into a production tap.

[www.triflowconcepts.com](http://www.triflowconcepts.com)

**Artematica kitchen system by Valucine** - Made entirely out of aluminium and glass, Valucine's Invitrum, designed by Gabriele Centazzo, scores highly on the sustainability front. Not only has it been made from sustainable material, but the kitchen's component parts are all 100 per cent recyclable after use too.
