

## TRIFLOW QUADRO SYSTEM AND TRIFLASK TO BE UNVEILED AT 100% DESIGN LONDON 2010

Triflow Concepts builds on its design credentials with the arrival of the Triflow Quadro System and the Triflask: a new range of watershed marking products to be unveiled at Design Intrinsically British and respected the world over for harnessing innovative design talent, Triflow Concepts is launching two eagerly-awaited new ranges of products at 100% Design this September: the Triflow Quadro System, a revolutionary 4-way water-delivery system and the Triflask, a portable and sleek water flask. Available in a broad range of styles and colours, the Triflask and the Quadro System are destined to become the must-have accessory for the Urban Environmentalist looking for healthy hydration at home or on the go.

The Quadro System comes in range of cutting edge designs but will also be available in a number of existing Triflow taps; including the award-winning Zaha Hadid version.

Joining the ranks of the Quadro System, Triflow Concepts will be introducing a new product category in the form of the Triflask: a new reusable drinking flask composed of copolyester which is impact resistant, durable, dishwasher safe and presents none of the health dangers associated with plastic bottles. The new design features a screw top lid that instantly opens with a

monopusher button on the front of the lid. In so doing, the Triflask is entirely operable with one hand and can be conveniently used in the tube, on feet, or the bicycle.
