This month Kitchen confidential

While the kitchens of the best restaurants are largely male domains, in most houses they are relegated to being functional, shut behind closed doors with a "women only" sign. **The kitchen** should be the centre of the home. It is a place to hang out and is often the space that adds most value to your property. So while there's room for the odd domestic goddess, men should have the passion not to be pushed out of the kitchen and to ensure it gets the design it deserves. For inspiration I have started with the **River Café** in London. This is ultra-modern, open-plan territory - and the proof of the pudding, so to speak, is that the food is almost impossible to beat. And if you thought the only **Porsche** you'd desire is one that can reach 212mph, check out the photo (bottom right) for one of the sleekest creations to come off a cook's dream production line.
