Hot off the press for Haverland

Haverland, innovator, designer and manufacturer of 'new generation' electric heating have published a new leaflet for their RCV range of radiators. 'RCV', is designed by David Marquez and leads the way in energy savings, thermal technology and aesthetically pleasing, contemporary design. 'RCV', complies fully with 'Part L' building regulations – the leaflet describes in detail how the 'RCV' meets these new regulations. The 'RCV' is designed for new build projects including hotel, apartment and office developments etc.

TRIFLOW QUADRO SYSTEM

With the introduction of the Quadro System, Triflow Concepts expands on its patented Triflow technology - known for delivering hot, cold and filtered water through a dedicated waterway in a single spout - and provides added convenience with the addition of instant hot, filtered water heated to 98°C. With a dedicated waterway for hot and cold filtered water, the Quadro System addresses all safety concerns: cross-contamination is successfully blocked, the spout remains cool to the touch, and the child safety feature ensures that hot filtered water can only be activated with intent. The Quadro System is available in existing Triflow tap models as well as in a number of unique designs, including the award-winning Zaha Hadid version. For more information visit www.triflowconcepts.com.

Moralt Door Blanks fast becoming the preferred choice for developers and housebuilders

James Latham's extensive range of Moralt door-blanks is now available nationwide, from every one of its ten UK sites. Kilma, one of the Moralt door-blank range, is fast becoming the preferred choice for housebuilders & developers involved in PassivHaus projects where they are increasingly being used in the construction of highly insulated, self-heating houses which are required to meet exacting and stringent construction specifications. Engineered specifically to comply with the latest building

regulations, Moralt Klima thermally insulating door-blanks boast a U-value of 0.89 which has won praise from the industry for helping the ideal house retain more heat than it loses. Latham's Product Champion for Doors, Steve Frommont, said: "Both our Firesound and Klima door-blanks offer significant benefits to two very different markets. In public buildings where acoustics are a priority, as the name suggests, Firesound offers the perfect balance between sound and safety, whereas for those searching for exceptional insulation and who may have been set demanding energy saving targets, Klima can help to create the self-heating house of the future. This is the first time James Latham has been able to service every part of mainland UK with Moralt and this is having a real impact on sales." For more information call **01672 811940** or email heat@haverland.co.uk.
