MAKING A STATEMENT AT 100% DESIGN

Triflow Concepts stole the show at this year's 100% Design with its latest innovation: The Triflow Quadro System.

The Triflow Quadro builds on the existing, patented Triflow system with the introduction of instant hot, filtered water heated to 98°C, all from a single appliance. Like all Triflow Systems, filtered water is delivered through a dedicated tube in the spout, to avoid cross-contamination. The Quadro incorporates a high performance Swiss-made ceramic filter cartridge which leaves all beneficial minerals such as calcium, magnesium and fluoride intact, while eliminating the harmful chemicals and bacteria found in ordinary tap water.

Designed with the urban environmentalist in mind, the Quadro System makes the kettle and bottled water a thing of the past. It comes in a range of cutting edge

designs but will also be available in a number of existing Triflow taps; including the award-winning Zaha Hadid version.

The stunning Triflow Quadro designed by Zaha Hadid was the focal point of the stand. Displayed on a custom made marble island, the eye-catching appliance amazed visitors with its seamless trajectory of curvilinear geometries expressing the continuous flow of liquid and its supreme functionality rolled into one.

Hidden within the Zaha Hadid design is a highly sophisticated manufacturing process that has never before been used for a tap.

The revolutionary shape employs the latest methods of production and a unique ceramic coring process, resulting in a tap that is as much a piece of art as it is a kitchen appliance.

Zaha Hadid's designs as well as other products in the Quadro range are available in different finishes including chrome, pewter, nickel and gold. New for 2010/2011 are brushed gold & black chrome. A must-have at just £6779+vat/€7975+vat
